DELTA style anthracite and chocolate

A 'matt' touch

We all have a different way of seeing, of interpreting spaces. We have our own personality that makes us unique.

The updated Siemens DELTA style mechanism collection has now been expanded to include the new chocolate and anthracite matt finishes. These finishes have personality, covering the whole surface of the series (key or cover and frame). A new, contemporary design that adds to the proven quality of Siemens DELTA style for the most demanding installations.

The advantages of these new finishes:

- New contemporary colours with a lot of personality.
- The chocolate finish provides a soft, elegant and chic touch.
- Matt finish in chocolate and anthracite.
- The matt surfaces are more elegant than other finishes, allowing the combination of gloss and matt textures at a competitive price.
- The style and finish of the new DELTA style is in vogue.
- A wide range of functions.
