SIEMENS

SCHUKO® USB socket outlet with quick-charging function (USB A+C)

This SCHUKO® USB socket outlet with double USB charger enables two devices such as smartphones, tablets, wireless headphones etc. to be charged quickly and simultaneously. The socket outlet space remains free for other devices, such as the lamp on the bedside cabinet.The fast charging function in accordance with the Power Delivery protocol revolutionises the standard for charging electronic devices.Thanks to high charging speeds, electronic devices are charged in the shortest possible time, in accordance with the protocol required by the EU for chargers from 2024 (Directive (EU) 2022/2380).

Your benefits:

• Available in the DELTA Miro, DELTA Line and DELTA Style series.

• Replace any existing Schuko® socket quickly and easily with a dual USB charger with quick-charging function.

• The double USB charger has overtemperature and overload protection.

• Output power 5V/3A, 9V/2.22A, 12V/1.67A, when using the USB-C charging socket.

• If two charging sockets are used simultaneously, the current can carry 3.4 A and is divided between the two charging sockets.

• Excellent eco-efficiency: At < 0.06 watts, the standby consumption is below the value required by the demanding European Energy Efficiency Directive.

USB charging fulfils the requirements of European regulations for **Power Delivery** fast charging of up to 20 W via the USB-C socket, which manufacturers such as Apple, Google and Samsung already rely on. Both USB ports are also compatible with **Quick charge**, a charging protocol used by manufacturers such as Huawei and Xiaomi.
